

MARCH & APRIL NEWSLETTER

Our offices will be closed the following days:

April 6 & 7.....Statewide Training
April 10.....Good Friday

NO 40 HOUR CLASSES OFFERED DURING THIS WEEK

Welcome Mick!

Mick Soiseth is the newest member of TrainND. He began his position as a Training Specialist the beginning of February. Mick says,

“I am excited to be with TrainND. I’m the new guy and learning a lot with a great staff here helping me get started. “

Medic First Aid & AED

Medic First Aid (MFA) has quickly become the first aid/CPR program of choice for a majority of oilfield and industrial companies in our area. MFA training programs use a very unique teaching design that has been proven to provide a low stress, student-based learning environment. Through the use of audio, visual and hands on demonstration activities; we are able to ensure a comfortable, confident understanding of the skills being performed. Many of the companies request Medic First Aid Basic Plus which includes a certification for the Automated External Defibrillator. MFA is offered at 1:00pm every Wednesday in conjunction with the 40 Hour Safety Awareness class. Pre-registration is highly encouraged so that we can properly prepare our materials and provide the best learning experience possible.
